

MULTIPLE READING DIGITAL SYSTEMS

Digital controllers for measurement and control of two parameters, with temperature reading (° C or ° F).

LD MULTICHANNEL series is controlled by an "ENCODER".

Working mode can be set:

- on / off
- pulse proportional
- proportional PWM
- fixed PWM

LD MULTICHANNEL PLUS has got, further more, working modes:

- PID
- proportional with water meter
- IN-LINE

Instruments connected in a network (up to 31 instruments) can be remotely controlled.

Combined with probes and probe holders, they can be assembled on panels to have a complete turnkey control system.
